This questionnaire is the culmination of a number of years of work by many people, not all of whom can be named here. We gratefully acknowledge that this questionnaire incorporates many items and scales from other key survey instruments that have been tried, tested and validated in a number of settings, specifically:

- a) IMAGES: International Men and Gender Equality Survey carried out by Instituto Promundo, the International Centre for Research on Women and local partner organizations
- b) WHO Multi-country Study on Women's Health and Domestic Violence against Women, Version 10
- c) South Africa Study of Men, Masculinities, Violence and HIV, carried out by the Medical Research Council, South Africa
- d) South Africa Relationships Household Survey developed by The Medical Research Council, South Africa
- e) Norway Study on Gender Equality and Quality of Life, carried out by the Nordic Gender Institute and the Work Research Institute

This particular questionnaire was developed by Dr Emma Fulu (Partners for Prevention) and Professor Rachel Jewkes (Medical Research Council, South Africa), with input from other members of the Technical Advisory Group for the Gender-based Violence and Masculinities Regional Research Project: Dr Gary Barker (Instituto Promundo), Dr Claudia Garcia-Moreno (WHO), James Lang (Partners for Prevention) and Dr Ravi Verma (ICRW).

This version of the questionnaire has also incorporated comments coming out of pretesting by the following country research teams involved in the Study:

Bangladesh: UNFPA and ICCDR,B, Dhaka

China: UNFPA, Beijing and Tianjin Normal University, Tianjin

Cambodia: UN Women and Domrei Research and Consulting, Phnom Penh

Title "Survey on Men and Gender Equality in Hunan Province, China"

Introduction

Good day. My name is _____. I am working with the Research Team of Men and Gender Equality on a project to better understand women's health and relationships.

You are invited to volunteer to participate in a research study that is conducted in Hunan Province. Before you agree to participate in this study you need to fully understand what is asked of you and to be sure you are completely happy with what is involved. If you do not understand the information or have any other questions, feel free to ask.

Purpose of this interview

The purpose of this study is to collect information so we can understand women's health, families and relationships. We want to understand more about the lives of women in China: how women think, how they have grown up, how healthy they are, their intimate relationships and how they relate to their families and children.

Many people are concerned that women have many health problems and some have very difficult lives. Our aim in doing this research is to learn more about women's health and lives so that the information can be used to develop ways of making them better. In order to really understand women we have to speak to a large number of women living in all different circumstances, including those who are healthy and those who are sick, those who have easier lives and those who have great difficulties. Because every woman is different, we are choosing women to interview for the research using chance – rather like throwing a dice. We do not know anything about the lives of the women we are asking for interview before we start to talk to them. You have been invited to participate because your household was one of [20 - CHANGE AS APPROPRIATE] houses randomly picked (by chance) from all the houses in this area.

We very much hope you will help us in our work as it is only by understanding all women that we can begin to develop ways of making the lives better for those who need help. We ask to have an interview with you; in this interview we will ask some information about you, things that have happened in your life that may affect your health and about your relationships. The interview will take approximately an hour.

What procedures are involved?

You are being asked to complete a questionnaire. There are no right or wrong answers; we want to know about you, your opinions or experiences. All your answers will be saved in the computer. This computer will not record your name. The interviewer will ask you the questions and record your answers on the little computer. She will be able to answer any questions you have during the interview. We will save the responses that you give to the questionnaire using a unique identification number. This means that your name will not be linked to the answers that you give. Information that is collected from you will be put together with information from [1500 OR NUMBER] of other women.

Are there any risks or discomforts from participating in this study?

We will conduct the interview in a private and safe place for both you and the researcher. The only potential risk from participating in this study is that you may feel uncomfortable answering some of the questions that may deal with some sensitive issues. The questions ask about your home, your family, your childhood, your ideas about relations between men and women, aspects of your health, your relationships with men and your views on laws and policies in your country.

Possible Benefits of this study

There are no direct benefits that you may get from participating in this study. However the information collected from this study may be helpful in improving the health and lives of women and men in [China. Your answers will help us make sure that the views and experiences of women like you are taken into account in designing future health and community programs.

What are your rights as a participant?

Your participation in this study is entirely voluntary. You can refuse to participate or stop at any time without giving any reason. Some of the questions are very personal. Please remember that you are free to skip over any question you do not want to answer and you are free to stop answering questions at any time.

Confidentiality

All the information that you give in this study will be kept strictly confidential. The consent forms that you will be asked to sign will be securely stored and access will be limited to the research team and study sponsors. The consent forms cannot be linked to the answers you give to the questionnaire. The results of the study will be presented in a respectful manner and no information which could enable anyone to identify you personally will be reported. If you would like to be kept informed of the progress of our project, we will be happy to share any reports or publication we produce with you.

Costs

There is no cost to you for participating in this study.

Has this study received ethical approval?

Yes, the [XXX] Ethics Committee has granted written approval for this study. You may contact them using the following details should you have any concerns or queries:

NOW PLEASE HAND BACK THE PDA TO THE INTERVIEWER. THANK YOU.

I would like to thank you very much for helping us. I appreciate the time that you have taken. I realise that these questions may have been difficult for you to answer, but it is only by hearing from women themselves that we can really understand about their health and experiences in life.

Here is a list of organisations that provide support, legal advice and counselling services to women in Liu Yang. Please do contact them if you would like to talk over your situation with anyone. Their services are free, and they will keep anything that you say private. You can go whenever you feel ready to, either soon or later on.

THANK YOU FOR YOUR TIME.
